Medical Quality Assurance Inspector

Medical quality assurance inspector with over 10 years of experience in quality assurance, product testing, and data analysis; passionate about safety and quality work. Key achievements: performed preventative maintenance on 300 machines, diminishing operating expenses by 24% over 8 months. Modified, cleaned, and fixed 150 processing tools to rectify defects found during inspections, reducing imperfections by 60%.

WORK EXPERIENCE

Medical Quality Assurance Inspector

November 2015 – Present

Resume Worded, New York, NY

- Executed 1K inspections of numerous medical devices using geometric dimensioning, tolerance principles, and basic GD&T fundamentals to discern non-fitting to fitting components.
- Isolated 500 non-fitting products to suitable test personnel or assemblers for adjustment and examined other jobs for completeness, compliance to requirements, and accuracy.
- Modified, cleaned, and fixed 150 processing tools to rectify defects found during inspections, reducing imperfections by 60%.
- Estimated and upheld the quality of 1.8K current merchandise, removed any weathered product, and determined which product needed to be discarded.

Validation Engineer

January 2013 – October 2015

Growths, San Francisco, CA

- Diagnosed malfunctions by conducting tests on 950 mechanical parts, using diagnostic software and precision measuring instruments to identify problems in specified equipment areas.
- Performed preventative maintenance on 300 machines, diminishing operating expenses by 24% for eight months.
- Ensured that 200 pieces of equipment were operating as intended by running over 1.0K regular tests, gathering information, and studying results.
- Inspected, sampled, and altered the composition and mechanics for producing 1.8K high-quality products within the first quarter.

Test Operator

August 2010 – December 2012

Resume Worded's Exciting Company, New York, NY

- Examined 800 new products and made alterations to 1.2K existing products using a collection of test equipment, including oscilloscopes, power supplies, signal generators, multimeters, and network analyzers.
- Collated 3.4K test results and registered them on Excel for accurate chart analytics and presentation.
- Adhered to standard operating procedures when conducting tests; reported over 900 deviations from the protocols to management within 24 hours.
- Assisted in developing test procedures and specifications for 200 new products based on the requirements of 5K customers.
